# Automatic Production & High QC Control system

Want to know about Ocean Star's production line and quality inspection?  
Let's have a look!

### Material filling

Fill the chemical item into the plastic container. Check the weight and operate the machine.

### Natural cooling

Place the items on tables for cooling.

### Lid covered

When the freshener is getting cooling. Make the lid covered. Make sure no mess go into container.

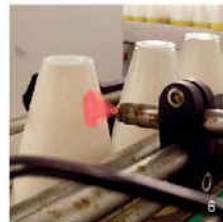

### During-produce QC

Check, measure, mark and record the useful data. This is our daily test to make sure the quality of products.

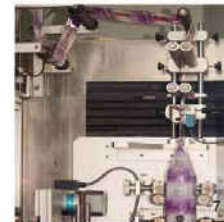

### Automatic senser control

It is widely used in our production, including character-printing, make production more accurate and final products look much nicer.

### Automatic packing

Automatic labeling system and steam shrink wrap make sure product with nice package.

### Shrink wrap

After cooling and checking, shrink wrap the package of freshener. A good design of package would attract more customers.

### Carton packing

Final visual check, then pack them into cartons. All fresheners are ready to sell.

## Testing in Lab.

Every product in Ocean Star must make samples separately and be tested strictly in our own lab, which is just one of the functions of the lab. Now, let's take cleaning toilet products as an example, and have a look at the specific process of the test.

# The advanced Automation

Gel/liquid auto filling machine. Improve efficiency and quality both.

Automatic packing equipment

Automatic labeling system and steam shrink wrap make sure product nice packing.

Auto filling system

Automatic gel filling system make product in good quality and makes increases capacity.
