# Tyre Sealer & Inflator

**Seals Punctures with no dirty hands**  
**Reinflates Tyre with No Jack Required**

6 923432 585010 DOT2 high pressure cans

AEROPAK® emergency tyre sealer Inflator is designed to quickly seal small punctures and leaks, reinflating your tyre in seconds. AEROPAK® tyre sealer Inflator does not require a jack or wheel removal; it's a fast, easy and clean procedure that gets you back on the road in seconds. Suitable for small punctures on all tubeless tyres. **IMPORTANT** inform your tyre repair shop that emergency tyre Sealer Inflator was used.

	E-Bike	125ml*1
	Small motorcycle	300ml*1
	Big motorcycle	450ml*1
	Sedan car tyre	450ml*2 or 650ml*1
	SUV tyre	650ml*1.5 or 650ml*2

# Liquid Tyre Sealant

**HOW MUCH FOR A TYRE**

Application	oz.	ml
Bicycle	3	89
motorcycle	8-16	237-473
Auto	16	473
Truck/SUV	20	592
ATV	24-32	710-946

1. Unscrew and remove the valve core, and deflate the tyre. 2. Attach hose to the bottle and valve stem and squeeze in sealant. 3. Screw the valve core back into the valve stem. 4. Inflate tyre to correct pressure indicated on sidewall of the tyre.

AEROPAK® Liquid Tyre Sealant seals punctures for the lifetime of the tyre. It's long lasting formula and it is made of a chemically neutral, 100% organic polymer that will not corrode or damage metal rims, tyres, plastic or rubber parts.

AEROPAK® Liquid Tyre Sealant will seal punctures up to 6mm and is non-flammable, will not freeze, is non-toxic and safe to the environment. Once AEROPAK® Liquid Tyre Sealant is in the tyre, it remains a liquid until a hole is found, allowing the sealant to escape and react with the atmosphere to seal the leak.

APK-8511

## E-Tyre Inflator + tyre Sealant

- Advantages:
- Repair 1-6mm Punctures;
  - No Harm to Tyre or Rim;
  - Non-Toxic, Non-Flammable;
  - Anti Rust;
  - Anti Freeze;

500ml  
APK-8520

6 923432 585201

1. If possible remove the object causing puncture.

2. Keep the punctured part between 5-7 o'clock position.

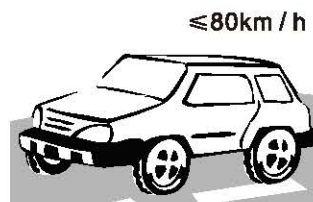

3. Shake the can well for about 30 seconds.

4. Screw connecting tube firmly onto tyre valve.

5. Hold the can upright, remove the protector cap, and press the button until tyre appears firm.

6. After pumping is finished, disconnect both ends of the tube. Immediately drive 3-5km to allow the sealer to spread in tyre and mend the puncture. Then check and adjust tyre pressure.

**Anti Static  
Cockpit Detailer  
Interior Clean & Protect**

- **Gloss Finish**
- **Repels Dust**
